/note="Vector: Lambda Uni-ZAP XR; Site 1: Eco RI; Site 2: Xho I; Filarial nematode parasite of humana: Two adult female worms of Onchocerca volvulus were isolated from consenting patients and quick frozen. Adult female mXNA was converted to double-stranded cDNA using reverse transcriptase and oligo(dT) Followed by RNase H and DNA pol I. The library has 7 x 10E5 independent recombinants and the average rinsert size is ~1100bp.The library was constructed by Michelle Lizotte-Waniewski with worms provided by Michelle Lizotte-Waniewski with worms provided by Dr. Stara Lustigman. The library is available from Dr. Steven A. Williams, email: genome@smith.edu."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CB402411 537 bp mRNA linear BST 15-MAY-2003

	Using G-protein-coupled receptor (GPCR)-like receptors to identify
	candidate compounds for the treatment and prevention of invertebrate
	parasites, especially helminths and insects.
	Claim 1; Page 173-175; 219pp; English.
	The sequence represents a DNA encoding a G protein-coupled receptor-like
	(GPCR-like) receptor protein. GPCR-like receptors and their associated
	nucleic acids may be used to identify candidate compounds for their
CC ability to	ability to modulate the activity of GPCRs. The sequences therefore are
	East transfill that properties and postings by analogous trail

Description

Query Match Length DB

Result No.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The sequence represents a DNA encoding a G protein-coupled receptor-like (GPCR-like) receptor protein. GPCR-like receptors and their associated nucleic acids may be used to identify candidate compounds for their ability to modulate the activity of GPCRs. The sequences therefore are useful for treating and preventing infection by endoperasitic and ectoparasitic invertebrate parasites, especially helminths and insects, and particularly ailments related to aberrant neurological and

The sequence represents a DNA encoding a G protein-coupled receptor-like (GPCR-like) receptor protein. GPCR-like receptors and their associated nucleic acids may be used to identify candidate compounds for their ability to modulate the activity of GPCRs. The sequences therefore are useful for treating and preventing infection by endoparasitic and ectoparasitic invertebrate parasites, especially helminths and insects, and particularly ailments related to aberrant neurological and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  120

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The sequence represents a DNA encoding a G protein-coupled receptor-like (GPCR-like) receptor protein. GPCR-like receptors and their associated muchalic acids may be used to identify candidate compounds for their ability to modulate the activity of GPCRs. The sequences therefore are useful for treating and preventing infection by endoparasitic and actoparasitic invertebrate parasites, especially helminths and insects, and particularly ailments related to aberrant neurological and neuromuscular function
                                                                                                                                                                                                                                    G protein-coupled receptor-like receptor; GPCR-like receptor; helminth;

                                                                                                                                                                                                                      The sequence represents a DNA encoding a G protein-coupled receptor-like (GPCR-like) receptor protein. GPCR-like receptors and their associated mucleic acids may be used to identify candidate compounds for their ability to modulate the activity of GPCRs. The sequences therefore are useful for treating and preventing infection by endoparasitic and ectoparasitic invertebrate parasites, especially helminths and insects, and particularly ailments related to aberrant neurological and

                                                                                                                                                                                                                                                                                                                              The sequence represents a DNA encoding a g protein-coupled receptor-like (GPCR-like) receptor protein. GPCR-like receptors and their associated nucleic acids may be used to identify candidate compounds for their ability to modulate the activity of GPCRs. The sequences therefore are useful for treating and preventing infection by endoparasitic and ectoparasitic invertebrate parasites, especially helminths and insects, and particularly aliments related to aberrant neurological and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               tartaataarceearreerreeaaareeecrarrearcacrrcaartraareceaaaea

                monkey COS-7 cells using mammalian expression vector pCDMB, which contains a replicating initiation point of SV40 and polyoma, and another replication initiation point of cytomegalovirus polymens and another prom, oter and M13. The cells expressing biologically active endothelin receptor were identified by incubating transfected COS-7 cells in culture containing [1251- Tyr13] endothelin-1, and detecting with X-ray film. Positive calls were then rescreened, a clone isolated and its sequence of insertion fragments analysed to determine the CDNA sequence of rat endothelin receptor. See also AAR25394. The present invention describes a method for determining whether a compound induces a toxic effect on a tissue or cell. The method comprises preparing a gene expression profile of a tissue or cell sample exposed to the compound, and comparing the gene expression profile to a database comprising data or information on the Tox mean and non-Tox mean value. The method is useful for predicting or identifying at least one toxic effect, particularly hepatocoxicity, of a test or unknown compound. The genes listed in the specification are useful as diagnostic or toxicity markers for the prediction or identification of the physiological state of tissue or cell sample that has been exposed to a compound, or to identify or predict the toxic effects of a compound or an agent. These may also be used as markers for monitoring toxicity progression or for drug screening. The present sequence represents a primary rat hepatocyte toxicity modelling related gene sequence from the present invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    344
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         614 Acriectiaadaarcarcracaadaadaadadadaaaaadaaroccaararcritaarcec 673
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 734 gcrácriógchaggaktriógccártriógagértőakártériócakacricérectricaraka 793

The present sequence is that of human neuropeptide FF (NPFE2) receptor CC cDNA, isolated from spleen cDNA by 5/3'RACE. The cDNA contained in planal, isolated from spleen cDNA by 5/3'RACE. The cDNA contained in planal, indicating a role in gestational contained in the placenta, indicating a role in gestational contained in the placenta, indicating a role in gestational contained in the regulation of fear, pain modulation of learning and memory and in the regulation of fear, pain modulation of learning and memory and in the regulation of fear, pain and analgesia, and may provide a target for treatment of depression, anxiety, phobias and mood of gestates. Incalisation to the requlation of extrapyramidal motor disorders. Localisation to the requlation of extrapyramidal motor contains. The invention provides rat and human NPFF polypeptides and antisense oligonuclectides, recretors, methods of treating an abnormality associated mammalian NPFF receptors, methods of treating an abnormality associated continuation of the requirement of compounds of the reating an abnormality involve administering an indicating an abnormality involve administering an increasing/decreasing NPFF activity involve administering an another continuation principarine release disorder, a gastrointestinal disorder, irritable bowel syndrome, a cardiovascular disorder; an electrolyte continuation and transmission, diabetes and mammary and present of disorder, an enemory enemory contained in disorder, an enemory enemory contained in disorder, an enemory enemory enemory contained and enemory enemory enemory contained enemory enemory contained enemory enemo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Nucleic acid encoding a mammalian neuropeptide FF (NPFF) receptor, useful for treatment of e.g pain, obesity, diabetes, hypertension, hypotension, hypoglycemia, respiratory disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         coordination disorder, a sensory integration disorder, obesity, pain, psychotic behaviour, morphine tolerance, nicotine addiction, opiate addiction, affective disorder or migraine (all claimed)

The invention relates to isolated nucleic acids encoding neuropeptide FF (NPFF) receptors. Also described is a method involving competitive binding for identifying a chemical compound which specifically binds to human Neuropeptide FF (NPFE) receptor. The compound identified by the method is useful for treating interstitial cystitis, steroid hormone disorder, psatrointestimal disorder, hypotension, diabetes, hypostrension, hypostyroamia, reproductive function disorder, obesity, morphine migraine, cardiovascular disorder, memory disorder, irritable bowel syndrome, migraine, cardiovascular disorder, memory disorder and motor integration disorder. The present sequence represents cDNA encoding human neuropeptide FF receptor, hNPFF2D.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              224

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The present invention relates to a neuropeptide FF (NPFF) receptor proteins and their DNA. The invention is useful for diagnosing or treating a disorder, e.g. diuresis, cardiovascular conditions such as hypertension, hypotension and congestive heart failure, memory loss, affective disorders, schizophrenia, pain, locomotor problems, circadian rhythm disorders, eating/body weight disorders, sexual/reproductive disorders nasal congestion, diarrhea, gastrointiestinal disorders, or disorders of the lower urinary tract. The invention is also useful in gene therapy. The present sequence is the human neuropeptide FP2 (NPFP2) receptor protein encoding DNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             GTGTGTGGTCTACCCTTTTAAACCAAAGCTCACTATCAAGACAGCGTTTGTCATTATTAT

The method involves determining whether the compound is a mammalian NPFF receptor agonist, recovering the compound and admixing a carrier. The method is useful for preparing a composition which specifically binds the mammalian NPFF receptor. The composition is used to treat e.g. a lower urinary tract disorder such as interstitial cystitis or urinary incontinence, a gastrointestinal disorder, prefities or urinary cardiovascular disorder, hypertension, diabetes, hypotension, diabetes, hypoglycemia, a respiratory disorder, asthma, a reproductive function
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    "Human NPFF receptor (NPFF2b) protein"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 PA;

The A4 polymucleotide is found in adult human kidney, liver, lung, and placenta. The receptor shows homelogy to the orexin receptor family. The A4 polymucleotide sequence is useful for producing recombinant cell lines that have commercial significance in discovering therapeutic compounds
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                314
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 284

The present invention relates to pharmaceutical compositions comprising
the coding sequences shown in ACH00815-ACH00827, or their encoded
proteins (shown in ABG75054, ABG75057). These are proteins
converted in the metabolism of triglycerides and in energy homeostasis,
cand their coding sequences. The composition is useful for the manufacture
of an agent for detecting, verifying, treating, alleviating or preventing
confusorders, including metabolic diseases such as obesity and other body-
weight regulation disorders as well as related disorders such as
confusorders, acting disorder, cachexia, diabetes mellitus,
hypertension, coronary heart disease, hypercholesterolaemia,
confusorders, osteoarthritis or galistones, in cells, cell masses,
confusorders are coding sequences can be used in the production of
transgenic animals which under- or over-produce the gene of interest. The
